

FROM RAW MATERIALS TO MOLDED PERFECTION

MOLDING OUR DESTINY

Thrilled to share the transformative journey at our factory, where the raw material metamorphose into high-quality ductile iron through a cutting-edge process!

From briquetting to handling iron filings, pellet iron, and scrap steel, all orchestrated within the intense heat of electric stoves, these materials undergo a remarkable transformation, emerging as refined ductile iron.

This innovative approach at our factory speaks volumes about the commitment to sustainability and quality. By repurposing industrial remnants through a meticulous process, they redefine the possibilities of what can be achieved in the manufacturing realm.

The advanced capabilities of the resin casting line in our factory truly caught our eyes.

With a capacity of 25 tons per day, its remarkable how they manage to maintain a smooth surface finish on complex products, setting a new standards in the industry.

By witnessing the seamless integration of technology and craftsmanship, it's evident that our factory is at the forefront of innovation.

Their dedication to delivering quality and precision in every casting piece is truly commendable.

If you are interested in visiting our factory, please feel free to send us an email. We would be delighted to provide you with more information and arrange a visit at your convenience.
