

ELEVATE YOUR EQUIPMENT

PREMIUM FUSION BONDED EPOXY COATINGS

Introducing our fusion bonded epoxy powder coating line, meticulously crafted to meet the highest standards of quality and performance. With chain length 200 meters, 330 hanging points, coating range from DN40 until DN1350, annual output is 10,000 tons maximum.

Our coatings don't just protect, the rich and distinctive RAL3002 color not only provides superior corrosion resistance but also infuse a touch of sophistication into your industrial equipment.

Safety and compliance are non-negotiable in any industry. Rest easy knowing our coatings meet the rigorous standards set by Underwriters Laboratories (UL) and Factory Mutual (FM), ensuring your equipment is not just coated but safeguarded.

The epoxy coating on our products doesn't just meet industry standards, it exceeds them. With a thickness of 250 microns and above, our coatings provide a robust shield against the harshest environmental conditions, ensuring longevity and reliability.

With years of unwavering dedication to quality, our fusion bonded epoxy powder coating line is a testament to our commitment to excellence. Entrust your equipment to coatings that not only meet but surpass expectations.
